

**JJ Plastalloy Pvt. Ltd.**

## Blow Molding

**Want to reduce colouring cost of your containers**

### Use JJ Plastalloy Colour Masterbatches

- Very high pigment concentration thereby achieving the desired colour at very low loadings
- Absolutely Consistent colour batches after batches since Quality In Quality Out (QIQO) Methodology used to manufacture these Masterbatches
- Heavy Metal Free Pigments used thereby the Masterbatch can be used for Direct Food Contact application.
- All the raw material being used chemically inert thereby product suitable for packaging of mild acids
- No adverse impact on various mechanical properties like Drop Impact, Compression Strength.
- Very high stability pigments used thus No Migration of Pigments in the products packed.
