

JJ Plastalloy Pvt. Ltd.

Ropes

Want to increase shelf life of your ropes even in adverse ambient conditions

Use JJ Plastalloy Masterbatches

- Absolutely Consistent colour batches after batches since Quality In Quality Out (QIQO) Methodology used to manufacture these Masterbatches
- Excellent Dispersion hence no issue of Frequent Mesh Choking, Increased time interval to clean the filters
- Very high Heat Stability. No chances of any burnt particles or carbon deposition
- No adverse impact on mechanical properties of the filament/fiber produced
- Very fine particle size raw material used which gives very good filterability thus suitable for low thickness filaments
- Very stable even in presence of Saline Water in Marine Environment
